

CoAL Hires Green, Monchuk Again

HATTIESBURG – According to the 10-May-2010 update to the Fall 2010 USM course schedule guide, the CoAL has found its two additional economists in former CoB economist Trellis Green, and current CoAL economist Daniel Monchuk. Green has apparently accepted CoAL dean Denise von Herrmann’s offer to join the CoAL-ECO team on a temporary basis. Green will cover one section of ECO 101 (3hrs) and two sections of ECO 201 (6hrs), for nine hours total. Monchuk is already employed in the CoAL, though now it looks as though he will become a clinical teaching faculty in CoAL-ECO.

Monchuk will be covering two sections of ECO 202 (6hrs), one section of ECO 340 (3hrs) and one section of ECO 450 (3hrs), for a total of 12 hours. Somehow, however, Monchuk will be teaching one section of ECO 201 and his ECO 450 at the same time – Monday and Wednesday at 2:00pm. Sources indicate that a simple solution would be to eliminate the one section of ECO 450, leaving Monchuk with a traditional teaching-research position (i.e., a 9-hour load).
