Unique A-Level Publishing Across USM's B-School

The recent series *Our Most Talented Colleagues* revealed some interesting information about the number of unique A-level journal publications in USM's CoB. This report puts some of that information, which is scattered across the first 9 (of 10) episodes of that series, together in one place. Table 1 below presents that information, as it provides a ranking of current CoB faculty by the number of unique A-level journal publications.

Total: 96
Average: 1.55

Gold line above marks the CoB median.

It is interesting that the CoB median is near the center of the smallish group of faculty who each have a single A-level journal pub. In this case, it falls just above new PhD Wesley Pollitte, who, as reported previously, is *author #7 on an 8-person publication* in *Journal of International Business Studies*. It's also interesting that James Lindley (FIN) and Marc DePree (ACC) are both in the top 3, while former CoB dean Harold Doty (MGT) barely slips into the top 5. These facts don't support Doty's opinion of the CoB's hierarchy while he was dean from 2003-07. Finally, the total count on unique As for the current CoB is 96, producing an average of 1.55.
