

## **Carter's Thoughts Enlightening**

More people than you probably realize find the Carter thoughts invaluable. They give us a window into the mind of CoB administrators like we've never had before. I keep thinking about the stories going around about how Doty and Niroomand talk about faculty and staff in the Dean's suite. They supposedly shout from office to office instead of retreating behind closed doors. Also, the vulgarities that get spewed in that suite are enough to turn the stomachs of the staff that work there everyday and have to put up with it.

I would remind Carter that "doing what someone tells you to do" is not how *Doty* operates. The dome ordered Doty to bring CoB teaching loads back up to 9 and he told USF faculty/staff, as well as members of the CoB, that he wasn't sure he would be complying with that. Grimes told Doty to hold off with the economics education program, yet Doty had his wife Susan on the road already. Thames and Grimes told Doty to stop with the course release time regarding summer teaching in the CoB, yet Doty continues to authorize secret summer salary deals involving course releases for compliant faculty.

So, one follows orders, even if immoral/unethical, and the other does what he wants to do. The CoB's managers need to find some souls.
