

# Martha's Podium

An Editorial Cartoon Series from USMNEWS.net

---

In response to [my recent announcement](#) regarding modifications to the USM Beechcraft King Air, VPAA Chad Driskell commissioned this concept structure. It's a small single-wide that professors in our polymer science department are working to construct an attachment mechanism for, and that we hope to install atop the plane sometime this summer. With the rooftop propeller system, this sitting room will be detached upon landing and flown from the airport runway to our meeting destination. This detachability will save us money on taxi fares and other incidentals. IHL members should be very comfortable inside this.
