

## **Nostalgia Series: George**

Dr. George Carter, Chairman of the EFIB Department, and former Chairman of Economics until he “resigned” after the Trellis Green lawsuit. Please see board posts on this topic. Bully in the name of “the rules”, rule breaker in the name of “following orders”, order follower extraordinaire until an “ethical” problem is detected, “ethical guru” utilizing only his unique “code of ethics”, user of that “code” until it produces a sub-optimal result for him, and always a team player even when committing “transgressions”.

What once was, now still is.
