“He does not teach. He expects you to learn the material, complete the homework without any of his help. He requires the use of the CPA Exam books (an extra cost) and compiles his test from these books.”

“If tests were given for autobiography every student would ace this class. Actually learning anything for the degree, your (sic) on your own.”

Student Comment

“BEWARE! I think that she is the only one who teaches ACC 401 and she is HARD. Her lectures are scrambled. She doesn't simplify things very well. Her tests are difficult and she knows this, which is why she gives bonus points, even though she clearly states in her syllabus that she does not curve or give bonus points. Homework is hard too.”
