All too often visitors to USMNews signal intentions. The above got our attention. The first question that came to mind, are Dave Duhon and John Lambert looking to “move up” in the academic ranks? From University of Southern Mississippi to University of Phoenix?

I don't know John Lambert except I read a research paper of his and it was, to say the least, sad, but quite in tune with the “quality” of some other faculty in the College of Business, especially the accounting faculty.

I'm more familiar with Dave Duhon. I remember the last time I talked to him. The long and short of it, Dave chose to do the bidding of then-Dean Doty in exchange for a promotion he couldn't earn on his own research record. I tried to convince him that he could earn his promotion—colleagues and I would help—but he was looking for an easy path to full professor. And he chose the easy path, which was to support then-Dean Doty's efforts to wreck the career of a colleague who was, and still is, a stellar researcher.

Well, John and Dave, best wishes.
