

Dear Dr. Dahlen,

I saw your advertisement in the *Hattiesburg American* and was directed to your anger management [website at USM](#). Here's a challenge for you: intervention to ameliorate an angry out of control mob of administrators and faculty (I recommend you consult a sociologist like [Professor Westhues](#)—an expert on mobbing). The angry dysfunctional aggressive administrators and faculty include President M. Saunders, past Interim Dean A. Williams, past Interim Director S. Jackson, Instructors J. Brown and P. Munn, Associate Professors J. Henderson and G. Pate, Professors R. Posey and C. Jordan, and Assistant Professor M. Anderson. Letters from them provide a demonstration of their anger and aggression. Their depositions also provide testimony in their own words that reveal the dysfunctional nature of their anger and aggression. In these hard economic times, their dysfunctional anger and aggressiveness are costing the University and state taxpayers hundreds of thousands of dollars. I recommend that you attempt to help them.

Should you choose to accept this project, I will provide you with their written statements and depositions to get the ball rolling.

Sincerely yours,

Marc DePree, Editor
